Narrative: Detection aircraft 31L flew over the fire at 1540 hours. In the late afternoon, the fire made a significant run eastward aided by sustained winds, rising slope, and continuous black spruce. Firefighters initiated a small burn out to successfully defend a cabin. Safety considerations and the lack of natural barriers limited efforts to defend an allotment further to the east, but increasing relative humidity reduced fire activity considerably as the fire approached the allotment. The fire was mapped (900 acres) by aerial observation prior to the evening's fire advances.
